

Mellor Village Hall, Mellor

A CASE STUDY WITH PAUL WALLACE, CHAIRMAN.

The village hall was built by the community. Money was saved over a decade, allowing people to benefit from the hall's excellent facilities. The hall has a large sports hall that hosts a range of exercise classes, children's football, drama classes and singing groups. On a Monday, the 150-year-old Balderstone Brass band practice at the village hall, allowing a range of generations to visit the hall every week.

"It was agreed by the village hall and the parish council that chargepoints would be an excellent solution for local residents, especially those without access to off-street parking to charge their current or prospective electric vehicles at the village hall. The parish council suggested a site on the Charge My Street website and we were contacted regarding the installation."

“

The hall currently has air source heat pumps and a solar array, the chargepoints fit perfectly with the hall's big focus on improving the environment.

”

"The installation of the chargepoint was excellent, there is a potential for further expansion of chargepoints in the future, as more people switch to EVs. This will link in with a potential wind turbine that the hall is currently looking into, to further their green credentials".

The chargepoints were launched in December 2020 and are ready to use by residents or visitors of Mellor. The chargepoints were installed by [BAY EV](#), a local installer based in Morecambe as part of the [SOSCI project](#), funded by Innovate UK.

CHARGE MY STREET

STUFF TO DO

"There are lots of walks around Mellor, the Parish Council are actively trying to improve walking routes around the area. There are currently plans to create a 20 mile looped walk, linking up with other trails in the local area. The chargepoints will encourage new people to the village hall, allowing them to use our excellent facilities whilst they charge

THE HALL
